

## LEP 復活日陰オペレーション成功への祝辞

オペ成功を伝えたところ即座に祝辞が届いた。以下はその一部である。

Daniel Baker (NASA Goddard Space Flight Center, Maryland) Warmest congratulations! I couldn't be happier for you and your team that everything worked out well. I am sure I speak for our entire laboratory when I say that we applaud the thoughtful and professional approach you took in this difficult task. We look forward to working with you for a long time to come on global magnetospheric issues.

Charles Kennel (University of California, Los Angeles) Congratulations on a successful maneuver! With so many other space disasters in the news today, it is a pleasure to hear of a success.

Richard McEntire (Applied Physics Laboratory, Johns Hopkins University, Maryland) Congratulations (!!!) on recovering the LEP experiment! I know that the past year has been very difficult, but Mukai has done a wonderful job of analyzing the existing LEP data to make clear to everyone the tremendous scientific promise of the instrument, while at the same time determining the cause of potential cure of the problem. Mukai deserves great credit – and so does ISAS for a very courageous decision to carry out the recovery operation.

Elden Whipple (NASA Headquarters, Washington D.C.) Thank you for the note on the “Geotail reborn”. I have passed it on to all the personnel in the Space Physics Division. Congratulations to you and all your colleagues on carrying out successfully such a difficult and complicated operation.

Tom Moore (NASA Goddard Space Flight Center, Maryland) Thank you very much for the exciting news about the recovery of the plasma instrument on Geotail. After seeing Mukai's talk at the IAGA meeting, I cannot express how delighted I am that this instrument has been restored to the operation. We will all be hoping that Geotail will last until we can get POLAR aloft to perform correlated studies!

Jack Gosling (Space Science Laboratory, LANL, New Mexico) Hearty congratulations on the successful recovery of the plasma experiment on Geotail. I am sure that all the space plasma community is very pleased about this turn around. We here at LANL are all “tickled pink” about your team's success.
